Near-IR (NIR) Reflective Gold Gratings

- Increased Reflection from 700 - 1100nm

Common Specifications

Physical & Mechanical Properties

Clear Aperture (%):	90	Construction:	Ruled Grating
Direction of Grooves:	Parallel to Short Dimension	Alignment of Grooves to Edge (°):	±0.5

Optical Properties

Wavelength Range (nm):	700 - 3000	Coating:	Bare Gold
Substrate:	Float Glass		

Technical Information

Typical Efficiency Curves for Ruled Gratings
Optimized (Blaze) Wavelengths from 1000-1600nm

Typical Efficiency Curves for Ruled Gratings
Optimized (Blaze) Wavelengths from 500-800 nm
